Work done till now

- We have completed Requirement analysis phase.
- We brainstormed/gathered and documented the functional and non-functional requirements for the project.
- We looked at various materials available online, written user stories.
- We have also completed the designing process of the project.

Work still going on and yet to be done

- We are yet to begin the development part of the project.
 - For Frontend we are planning to use :
 - HTML 5 , CSS, JavaScript.
 - For Backend database we are planning to use :
 - SQL
 - For development - Python Flask
 - For Designing we have used Figma.
 - For Testing we are planning for Black box testing for different functions of the website and also exploring other techniques.
 - For project management we will be using GitHub.
